

Second webinar Japanese Young Researchers in France - June 24th, 2021 Program

8:45 – 9:00 Opening of Zoom connection; please be connected before 10:00 (Paris time / 16:45 – 17:00 Tokyo time)

9:00 – 9:05 Welcome address by Thierry Gaude

9:05 – 9:30 Dr. Mariko ASAOKA (Assistant professor at Nishitani lab, Kanagawa university, Japan) **Towards unraveling the molecular basis of flowering stem integrity**

9:30 – 9:55 Yuki AOI (1st year PhD student, INRAE IJPB, Versailles and INRAE BIA, Nantes) **Polysaccharide production in seed mucilage; a tool to accelerate cell wall biology research?**

9:55 – 10:20 Dr. Naoto SANO (Post-doctoral fellow at IJPB INRAE Versailles) **Wearing a good coat: GWAS combined with image analysis demonstrates role for cytokinins in the control of seed coat permeability and longevity**

10:20 – 10:45 Dr. Shogo TAKATANI (Post-doctoral fellow, RDP ENS Lyon) **Microtubule dynamics behind different cell division rules, shortest plane or tissue stress**

10:45 – 12:00 Free discussion between Japanese speakers without the presence of other participants
